

QUASHIE SCHOOL PROJECT

Computer lab for Junior High in Ghana

Join us and make a difference

Support the computer lab project in Oyoko

Together with *Wilde Ganzen*, we are starting the project 'computer lab for Junior High in Oyoko, Ghana'. Our aim is to raise the entire amount for this project by the end of 2024. Wilde Ganzen will contribute 50%. Will you join us?

Support for Junior High in Oyoko

In 2002, I met my father through the Dutch TV program Spoorloos (Without a trace) in the village of Oyoko in Ghana. *Lucy* took care of him, which meant she could hardly go to school. She attended the Junior High in Oyoko and is now manager Ghana of the Quashie School Project. Lucy and I are very keen to give students at this school the same opportunity that she had.

Warm greetings, Moniek Jacobs
Ambassador Quashie School Project

What are we going to do

We will convert a classroom into a computer lab. There will be 10 computers for 30 students. The room needs to be secured, needs to have proper sockets and fans. There will be sturdy benches for the students and tables for the computers. We will use an offline hotspot. Teachers will also be trained to use the software and maintain the computers.

Why we do this

We believe it is important for students to be able to use a computer from an early age. It is distressing to see computer lessons being taught with a computer drawn on a blackboard. If there is a computer at all, 10 to 15 pupils have to work on it together. The Ghanaian school system expects students to know how to operate a computer and are examined in this. Learning is done by experiencing it yourself.

Added value

A good foundation is very important. If pupils know how to work on a computer from an early age, they will benefit greatly during their subsequent studies or when running their own business(es).

Costs

Costs Computer lab project		
Product	Quantity	Price
Desktop computer	10	3000
Hotspot Divice	1	800
Electrical work	1	290
Security classroom	1	300
Tables and benches	5	875
Training	1	350
transportation	1	375
Total price		5990

Experience

Empower Playgrounds Ghana has extensive experience in, among other things, setting up computer labs in schools.

They also train teachers and provide year-long maintenance. The Quashie School Project has seen many successful Empower Playgrounds projects. They have also provided us with the photos and information. We look forward to a successful cooperation.

If you want more information then feel free to get *in touch*.

Warm greetings, Moniek
